

T-shirt Bag

1. Cut off sleeves and neck band. You may decide how much to cut off, the deeper you cut, the bigger the bag "handles" will be.
2. Turn cut edge on neck and sleeves under and stitch to hem.
3. With t-shirt inside out, sew bottom together. You may want to cut off the hemmed portion before stitching.
4. If desired, measure in about 2 inches on each end of the bottom seam and sew across to square off bottom of bag.

Option: use 2 t-shirts, prepare and sew together to make a sturdier, reversible bag.
